Re: AR Architecture, London

We have been working as Heritage Consultants with Alexander Rakita and other colleagues at AR Architecture for over a year on a major Grade 2* listed project in Eaton Square and have found the working relationship to be both responsive and pro-active.

Their openness and willingness to advice and recommendation throughout the concept and detail design stages of the project has enabled a stronger resolution and acceptance by the Statutory Authorities and the Design Team whilst fully respecting the overall requirements and aspirations of the client.

We have found AR Architecture's pro-active communication and availability to resolve matters both on site and outside meetings a positive contribution to the overall success of the project. This has been endorsed by the support from Westminster City Council and English Heritage as well as their overseas client and the Design Team.

We look forward to working on other projects with AR Architecture for which we have already been considered and can only recommend their services to you accordingly.

Kind regards,

Jeremy Blake
